## INTRODUCTION

B.Tech Computer Science student (AI & ML focus) with hands-on experience building ML models for fraud detection and LLM-based data analysis agents using Python, XGBoost, Scikit-learn, and RAG pipelines. Seeking ML/Data Analyst roles applying classification modeling and SQL-based pattern analysis.

## WORK EXPERIENCE

### Machine Learning Intern - SRM AP University

May 2025 - July 2025

- Built fraud detection ML models using Python & Scikit-learn; handled class imbalance and feature engineering.
- Improved fraud detection precision by 15%, reducing false positives in financial risk management
- Analyzed transaction patterns using SQL to identify high-risk activities and summarized model performance and risk findings in stakeholder-facing insight decks.

## PROJECTS

### Credit Card Fraud Detection using XGBoost | Machine Learning

[Link](#)

Built a credit card fraud detection model on highly imbalanced transaction data, applying class-balancing techniques and feature engineering to improve fraud precision while minimizing false positives.

*Tech Stack:* Python, XGBoost, Scikit-learn, Pandas, NumPy, SMOTE

### LLM Based Data Analysis AI Agent | GEN AI

[Link](#)

Built an AI-powered Data Analysis Agent using Streamlit based GUI, Google Gemini, Pinecone and NLP techniques, implementing a RAG pipeline for automated insights, visualizations and context-aware data querying.

*Tech Stack:* Python, Google Gemini (LLM), Streamlit, Pinecone, RAG, NLP, APIs

### Vehicle Detection | Computer Vision / Machine Learning

[Link](#)

Built a real-time vehicle detection system using deep learning to identify and localize vehicles in images and video streams, applying transfer learning to improve detection accuracy on traffic footage.

*Tech Stack:* Python, YOLOv8, OpenCV, PyTorch, NumPy

## EDUCATION

|             |                                                           |            |
|-------------|-----------------------------------------------------------|------------|
| 2023 - 2027 | B.Tech in Computer Science at <b>SRM University - AP</b>  | CGPA: 7.7  |
| 2021 - 2023 | Intermediate at <b>Sri Chaitanya Jr College</b>           | CGPA: 7.88 |
| 2020 - 2021 | Secondary Education at <b>Sri Chaitanya Techno School</b> | CGPA: 10   |

## SKILLS

|                      |                                                                                    |
|----------------------|------------------------------------------------------------------------------------|
| Languages            | C++, Python, SQL                                                                   |
| AI/ML                | ML Models, GenAI, LLMs, NLP, RAG, Computer Vision                                  |
| Libraries&Frameworks | TensorFlow, PyTorch, XGBoost, Scikit-learn, OpenCV, Pandas&NumPy, Flask, Streamlit |
| Tools&Platforms      | Git/GitHub, VSCode, REST API, Pinecone                                             |
| Core                 | DSA, OOPs                                                                          |
